ZAFFERANO PERLE BOWL

Zafferano make seriously good handmade coloured glassware, wine glasses and dinnerware. Murano glass is recognised as one of the most coveted symbols of style and status across Europe. But today there are fewer of the island's glass-makers due to the economic woes of the past decade as Murano lost out to other parts of the world for the high volume commercial work. Not content on being a museum to a lost craft, the remaining Murano glassblowers are revolutionising the industry and rekindling their artisanal tradition. www.casaecucina.com.au
